PROJECTS

GADGETHUB (E-Commerce WebApp) | *JEE (Servlet & JSP), SQL, Bootstrap* — **Jan 2025 – Present**

- Developed a dynamic and responsive e-commerce web application for electronic gadgets using Java EE technologies. Built front-end pages using HTML, CSS, and Bootstrap for a professional and consistent UI across devices.
- Implemented secure user authentication with login and sign-up functionality using Servlets and JDBC.
- Created product management features including categorized gadget listings, detailed product views, and admin-side upload/update options.
- Enabled shopping cart functionality and order processing, with robust SQL database management for persistent storage.
- Ensured full mobile and desktop compatibility using Bootstrap's responsive design system.
- Designed and queried relational database schemas in SQL to manage users, products, and order history efficiently.

SEASION CLOTHES (E-Commerce WebApp) | *HTML, CSS, Bootstrap, JavaScript* — **May 2024**

- Built a responsive web application for seasonal clothing with product listings, real-time search, cart management, and a secure checkout process.
- Delivered optimal user experience with visually appealing and dynamic UI/UX components.
- Designed seamless checkout flow with proper form validation and smooth user interactions.
- Used Bootstrap's grid system and utilities to ensure mobile-first responsive design.
- Enhanced UI using JavaScript for dynamic product updates, modals, dropdowns, and carousel features.
- Focused on SEO, accessibility, and image optimization to ensure fast load times and reach.
